

elka® quality guarantee

Our elka®-particleboard is made from domestic wood. The greatly reduced amount of sand and foreign bodies, provides processors **less tool wear** and cost savings. Our particleboard is **very bright** and therefore ideal for veneers and surface coatings.

Use in compliance with DIN EN 312:2010-12

- P1:** Boards for interior use, non-load bearing.
- P2:** Boards for interior furnishing for using in dry areas.
- P3:** Boards for non load-bearing purposes for use in humid areas.
- P4:** Boards for dry areas, load bearing.
- P5:** Boards for humid areas, load bearing.
- P6:** Heavy duty boards for load-bearing purposes for using in dry areas.

Your authorised dealer will be pleased to advise you:

More time... thanks to elka's diversity & speed.

Particleboard & lightweight wooden materials

elka® - take it easy!

elka® Quality right down the line

As a partner for retail locations and industry at the brand-level, we offer a wide range of high-quality particleboard.

Specialising in customer preferences

Our comprehensive service range from P1 - P6 particleboard, custom made for the retail and industrial sectors. The combination of wood materials with one another and also in particular with sawn timber and natural wood boards offers you unique advantages.

Quality

Domestic wood is used to produce elka® particleboard. The use of raw materials corresponds to the EU Timber Regulation (EUTR). Combined with the latest technology, superior knowledge and advanced quality management, the basis is formed for customer satisfaction.

Full service

Our employees provide an excellent, fast customer service at your location and in order processing thanks to high level of expertise.

- ✓ Exceptionally precise fit
- ✓ High degree of stability
- ✓ Easy, time-saving installation
- ✓ Dust groove on back

Standard size pre-cut boards

Custom-made production available in lightweight, P1, P2, P3, P4, P5, P6

Combined delivery of natural wood panels and sawn timber is our stock-in-trade!

elka® honeycomb particleboard LIGHT

elka® particleboard LIGHT

elka® creates innovative solutions for the wood materials sector in line with the latest in application and processing trends.

Honeycomb particleboard from 45 m³		
Format*: 5200 x 2050 mm	Thicknesses in mm*	
	38	49
Top layer thickness in mm	8	8
kg/m³	330	285

* other thicknesses on request

elka® is also following the trend in the particleboard sector and has also „lightened“ its particleboard!

The low specific weight of elka® particleboard is impressive. Users can process these panels on their existing machinery. These boards feature a densely packed middle layer making them excellent for edging.

elka® particleboard LIGHT

Designations and formats*	Thicknesses in mm
Format*: 5200 x 2050 mm	
500 kg/m³ +/- 5 % 38, 50 mm thick	Particleboard stock range
